Claims 1-4 are allowed.

The following is an examiner's statement of reasons for allowance:

The prior art of record neither shows nor suggests a rear projection display comprising all of the elements of claim 1 in combination and in particular:

“an auxiliary lamp that is higher in a rate of increase in luminance at a start of illumination than the light source lamp, and arranged such that a light emitted from the auxiliary lamp can reach a rear surface side of the screen without passing through the light-modulating section; and

a control section that causes both of the light source lamp and the auxiliary lamp to illuminate at power on, and causes the auxiliary lamp to extinguish before luminance of the light source lamp reaches a luminance level high enough to cause the display screen to be displayed on the screen by projection.”

The prior art of record neither shows nor suggests a rear projection display comprising all of the elements of claim 2 in combination and in particular:

“an auxiliary lamp that is higher in a rate of increase in luminance at a start of illumination than the light source lamp, and arranged such that a light emitted from the auxiliary lamp can reach a rear surface side of the screen without passing through the light-modulating section; and
